

CHAPTER V

CLOSURE

In this chapter, the researcher presents conclusions and suggestions for those involved and other researchers for further research in this field.

A. Conclusions

This study focused on analyzing the types and the most dominant types of illocutionary acts that were found in Muniba Mazari's speech in 2018. The conclusions of this study as follows:

- 1) All types of illocutionary acts presented by Muniba Mazari's speech in 2018. The types of illocutionary acts are representatives, expressives, commissives, directives and declaratives.
- 2) The most dominant type of illocutionary act in Muniba Mazari's speech in 2018 is representatives. The frequency is 73 data (52.51 %) because during the speech Muniba was stating, telling, describing and informing what had happened to her past and present life. The following type is directives 30 data (21.58 %), followed by expressives 18 data (13%), commissives 10 data (7.19%) and the last is declaratives 8 data (5.75 %).

B. Suggestions

The results of the research may result in suggestions for the following parties:

1. For Students, particularly English learners, should improve their knowledge and understanding of pragmatic language, focusing on the study of illocutionary acts.
2. For teacher, particularly English teachers, to teach pragmatics, or how to grasp the message of a speech based on its context.
3. For future researcher, This study is expected to serve as an motivation for other potential researchers to develop more extensively and thoroughly in the future.
