

## ABSTRACT

Melinda Rizki Noor Hidayah, 20 23, *Problems of Teachers, Parents, and Students During Online Learning at MI Al-Fitrah Tamiang Layang*. Thesis, Department Madrasah Ibtidaiyah Teacher Education. Supervisors: (I) Mr. Dr. M. Rahmi, M.Pd and (II) Mrs. Mahmudah, M.Pd.I

**Keywords:** Problems of Teachers, Parents, and Students, and Online Learning.

The existence of *the COVID-19* epidemic that has swept the entire world is something very scary considering that this virus can attack anyone and have a deadly impact. In order to reduce the spread, the government issued restrictions on this interaction then had an impact on all life activities including educational institutions, the teaching and learning process that requires physical presence in the classroom is now replaced by *online* learning through the use of digital technology. So that there are obstacles experienced by teachers, parents, and students in carrying out *online* learning during the *Covid-19* period

The research method used is qualitative descriptive. The data was obtained by the author using interview techniques, with the number of respondents namely the Principal, Homeroom Teacher of Grades I-VI, Representative of Homeroom Class I-III, and representative of Class IV-VI Students at MI Al-Fitrah Tamiang Layang. The location of this research is MI Al-Fitrah Tamiang Layang located at State 45 RT 15 Tamiang Layang, East Dusun District, East Barito Regency, Central Kalimantan. The data obtained is then processed with reduction, data presentation and verification techniques to provide interpretation of the data that has been presented so that it becomes clear and easy to understand.

The results of the research conducted by the author are *first*, online learning at MI Al-Fitrah Tamiang Layang using the whatsapp application the learning process is carried out online using the *based* learning method (video and voice), students are not only focused on following *learning* but students are also given assignments by the teacher. *Second*., electronic devices such as mobile phones, and internet network connections are important needs to carry out online learning and supporting infrastructure is a place in each student's home because learning is carried out from home. *Third*, the problem experienced by teachers, parents and students is the same is the network and parents of students do not have mobile phones so that it is difficult to participate in online learning and because the slow network results in late assignment collection.
