

## **CHAPTER V CLOSURE**

In this chapter, researcher presents conclusions and suggestions based on the data that had been analyzed and discussed

### **A. Conclusion**

Based on the findings of the research, it can be concluded that :

1. The problems faced by teachers in teaching English for young learners through Online Based Learning during Pandemic COVID-19 are (a) limited technology facilities access, (b) lack of students honesty in doing their assignment, (c) students were not doing their assignment, (d) limited internet Quota, (e) learning material was not well presented, (f) difficulty in applying the curriculum assessments, (g) lack of students motivation, (h) lack of communication between teacher and students.
2. The possible solution problems used by teachers in teaching English for young learners through Online Based Learning during Pandemic COVID-19 are (a) students or students parents could take or copy the offline learning material and assignment provided by the teachers at school, (b) Giving attention and feedback to the students' assignments and directly and ask students to do the assignments themselves, (c) come over to students' house and gave the assignment or asked students to do the assignments directly,

(d) Asking students to take the print out/offline material that teachers provided at school, (e) Giving students material that easy to understand and add youtube material along with assignments, (f) do observation through students' diligence in the collecting their assignment, (g) Gving online motivation and motivate her students through their parents, (h) directly gave comment on the students assignment and directly gave comment on the students assignment.

## **B. Sugestion**

Based on the findings of the research, the researcher would like to provide some recommendations to the people listed below.

### 1. For school principals.

School principals should provide support in the form of counseling guidance and adequate facilities for online learning to teachers who face difficulties in conducting online learning.

### 2. For Teachers

Teachers should try to take advantage of existing technological facilities to increase the learning enthusiasm of young learners who are trying to learn English, by applying fun learning methods such as holding games using various kinds of online applications that are easily accessible, for example quiziz. young learners are really like games this will help increase their interest in learning online.

3. For students' parents

The role of parents is very necessary in online based learning, parents should motivate and pay attention to their children so that they are enthusiastic in attending online lessons. Parents play a big role in instilling the value of honesty to children, parents can help children complete their tasks, but let children explore learning and work tasks with their respective abilities could help then improving their learning ability.

4. For future reseachers

Researchers in the future who want to do research on the same topic can use the study's findings as a reference to conduct more research in a different environment.
