

## **CHAPTER V**

### **CLOSSURE**

This chapter presents conclusions and suggestions based on research findings where the conclusions are discussed based on the research questions in chapter I, and suggestions are future hopes for teachers, students or further research related to this field.

#### **A. Conclusion**

Based on the results and discussions presented in the previous chapter, the researcher concluded the data on two research questions. Namely the factors that influence students in committing plagiarism and the strategies applied by students to avoid plagiarism.

##### **1. Factors that influence students in committing plagiarism**

Based on the results of questionnaires and interviews, researchers found two main factors that influence students to commit plagiarism, namely limited time, lack of time management skills and lack of writing skills.

##### **2. Strategies applied by students to avoid plagiarism**

Based on the results of interviews and questionnaires, researchers found that most of the strategies applied by students were by applying writing techniques such as paraphrasing and summarizing and using the help

of online applications or websites that were used to write automatic paraphrases and summaries.

## **B. Suggestion**

Based on the discussion and conclusion, researcher give suggestions as follows:

### 1. For lecturers

Lecturers are suggested to provide students with knowledge about plagiarism, how to avoid it, and apply punishments if students commit acts of plagiarism so that it does not happen again in the future.

### 2. For students

Students are suggested to understand the types of plagiarism and learn about strategies to avoid it.

### 3. For future research

The researcher suggests that future researchers conduct more in-depth and specific research on plagiarism from the lecturer's perspective.
