

## CHAPTER V

### CLOSURE

#### A. Conclusion

Based on the findings of this research, it can be drawn some conclusions as follows:

1. There are 4 types of grammatical error in K-Pop stan tweets on Twitter based on the theory of Dulay, Burt, and Krashen (1982) Surface strategy taxonomy namely omission, addition, misordering and misformation.
2. The most frequently mistakes that the researcher found in K-Pop stan tweets on Twitter was omission with 41 out of 50 tweets and the most error that researcher found is omission in grammatical morphemes.
3. The number of addition error were 9 out of 50 tweets and simple addition was frequently occurred in K-Pop stan tweets on Twitter.
4. The number of mis-formation error were also 9 out of 50 tweets that researcher found in this research.
5. Mis-ordering came to the least types of grammatical error that researcher found in this research with only 1 tweet.

Based on the data above, it showed that the K-Popers on Twitter commonly forget to add verb auxiliaries especially *to be* in their tweets

because they use English language to express their thoughts without worrying about the grammar. Moreover, English is not their first language and they do not care about how to write the well-formed sentence as long as they can understand each other.

## **B. Suggestions**

The researcher would like to draw the suggestion of this research after analyzing about the grammatical error in K-Pop stan tweets on Twitter, so it can be useful for everyone.

1. For the readers

to know about basic grammar and re-check their writing first before posting it in social media to avoid creating some grammatical errors and it can be helpful for them to understand about grammar.

2. For the future next researcher

it can be suggested as the future research to examine and explore more about grammatical errors based on the object of the research and look for another topic on Twitter because K-Pop stan will always stay on Twitter to get more information about their favorites. For better understanding, it can be suggested that the researcher can share their knowledge about grammar on Twitter because it can be chosen as media to learn and practice new language.
