

## **CHAPTER V**

### **CLOSURE**

#### **A. Conclusion**

Based on the findings and discussion, it can be concluded as follows :

##### **1. Advantages of TikTok in Task Based Learning**

In general, TikTok is an interesting and easy to use audio visual media. Many people especially teenagers use this application to create content. TikTok provides various features that can help learning speaking, such as subtitles, translate, translation, templates, filters, music, hashtags and editing features. For additional, TikTok application are classified as helping learning to be more effective and efficient media. The features used and the content analyzed by students can help them in their Task based learning.

##### **2. Challenges of TikTok in Task Based Learning**

Most of the students still have speaking difficulties. These speaking difficulties consist of a lack of vocabulary mastery, difficulty pronouncing English words, and difficulty constructing English sentences. In addition to the discussion, there are several challenges that students complain about in this application. The challenges students face when using TikTok are that it uses a lot of quota, requires sufficient storage, an internet connection that must be stable, and can cause cellphones to get hot if they use TikTok for

too long. Another challenge is the fyp algorithm where the number of videos cannot be predicted by fyp in other viewers.

## **B. Suggestions**

It is important to provide suggestions to educators and the future researcher with consideration of findings.

### **a. Suggestion for Educator**

Researcher suggests that teachers can develop the TikTok application in teaching speaking Task based learning. Using TikTok, which can be accessed anytime and anywhere, can help students learn actively and independently. Apart from that, TikTok helps students so that learning does not feel monotonous and boring which can attract students' interest in learning. To overcome the challenges of TikTok which requires a large quota, sufficient memory storage and a stable internet connection, teachers can recommend students to use TikTok lite. TikTok lite usage is smaller in terms of quota usage, memory storage and internet connection compared to regular TikTok.

### **b. Suggestion for Future Researcher**

The researcher suggests that future researcher can use the results of this research as a reference related to topics with other English skills.
