

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the research result of the speaking ability between students debate club and non debate club of the sixth semester students, there are some important conclusion that can be presented by the researcher as follows:

1. The students' speaking ability of students who follow debate is classified in excellent category. Based on the calculating mean of the test result from 11 students, it is 20.18 and the students' speaking ability of non debate club is classified in Fair category. Based on the calculating mean of the test result from 11 students, it is 15.18.
2. The result of the calculation using t-test shows that a comparative study between debate club students and non debate club students is 5,48 as called t-count. After t_{test} is consulted with t_{table} at df 20 in the significance standard 5% (3.10) and 1% (1.36) it is found that t_{count} is higher than t_{table} ($5.48 > (3.10)$ for 5% or $(5.48 > (1.36)$ for 1%. It means that

H_0 (Zero Hypothesis) is rejected and H_a (Alternative Hypothesis) is accepted. Thus, there are significance differences in students' speaking ability between debate club students and non debate club students at English Department IAIN Antasari Banjarmasin.

B. Suggestion

From the research result, discussion and conclusion which is discussed above, researcher wants to give suggestion as follows:

1. The students who follow debate club of English Department to study hard in English subject to help them in daily life conversation and all skills of English and also should be creative students to get more knowledge, not just from teacher but through English media like English program at TV and the most important is practice your English any time and any conditions.
2. The students who do not follow debate can join in debate club to try and practice English so that can speak more interesting than before and then be confident.
