

CHAPTER V

CLOSURE

A. Conclusion

After analyzing, the researcher makes the conclusion from this research. Slang is in the informal words used by a particular social group and each has the positive and negative meaning, and the meaning depends on the user. However, the meanings of slang language used in Western songs lyrics are various.

The researcher found the differences are in terms of theme or topic used by singer and number of slang words between year 2000 and after year 2000. The result shows that the songs before 2000 are more about falling in love, backbiting, broken heart, and sadness. While 10 Western songs after year 2000 shows are more about social theme such as wealth, party, food, wickedness, anxiety, sex, ambitions, and money. Number of slang found in before 2000 are 96 slang words and the researcher found 101 slang words from songs produced after year 2000.

The researcher also research about slang word used in the lyrics of Western songs. The researcher used six characteristics of slang to analyzes slang words in Western songs lyrics. They are, clipping, blending, multiple process, affixes, coinage, and acronym. The researcher make a classification of word formation to found the characteristics of slang words that are used in Western songs lyrics

Every slang word have its own meaning. The slang words is the formality of language is tied to the situation, most of the slang words are used in informal situation, so the rapper often uses informal language. Every language contains vocabulary and grammar, but sometimes there is not grammar in words structures, it cannot be considered as grammatical language.

B. Suggestion

Through this paper, the researcher suggests that slang can be one of the topics for research study in the future. The researcher realizes that this study however, has not been satisfactory yet. The researcher hopes that other researchers would continue this study and give many contribution for student of English Department Tarbiyah Faculty of State Islamic University of Antasari. Furthermore, slang terms does not always produce new dictions, therefore the writer suggests that it is possible to explore semantics change of slang. Finally, the researcher wants to say that there are some of slang terms should be avoided in daily communication, because they have vulgar and rude meaning (such as *fuck*, *damn*, *fuckingsmother*, *ass*, *bitch*, *asshole*, etc), and also the writer hopes that this paper will be useful for students who want to do research regarding slang.
