CHAPTER V
CLOSURE

This chapter contains conclusion and suggestion of the study. The conclusion presents the result of the analysis conducted in the previous chapter. This chapter ends with suggestions for readers and further research on field studies.

The result showed that there were 60 data that error in written English at public area (public area here means: shops, streets, markets, and schools) in Banjarmasin. The kinds of written English are: written English of advertisement, brand names, notice, and service.

A. Conclusions

Based on the research result, the researcher can conclude the points as follows:

1. From the data that found, the researcher classify them based on their kinds of error, they are: spelling to pronunciation error (their types are spelling errors of addition, deletion, substitution, and transposition), and grammatical error (exactly in word order error and preposition error).
2. The most common error found is in spelling to pronunciation, there are 47 data or about 78 % (and the most dominant error was found in spelling errors of deletion with 11 data). Then there are 11 errors found in word

order or about 18%, and the last one there are 2 errors found in preposition or about 4%.

B. Suggestions

Having done the research, the researcher gives some suggestions as follows:

1. Morphology is one of core areas in linguistic. It studies about structure of word, and also related to word formation which is about process of creating a new word. The researcher suggests that teachers in school or lecturers of English Department of IAIN-Antasari Banjarmasin have to use the data that found as their authentic material in teaching learning process.
2. By knowing about many errors that found in written English at public area in Banjarmasin, everyone has responsibility to tell about the truth (especially people who have knowledge about English).
3. The agent of public area and written English printer especially are suggested to pay more attention to the word of their written English.
4. Then, for the next researcher that interested in linguistic research exactly in word formation the writer suggests to do further research in any various written English at other area, such as in more specific area like hospital, hotel, restaurant, and etc.
